📘 DIGITAL LITERACY PROJECT REPORT

CSE0001 – Digital Literacy

VIT Bhopal University

---

1. Student Details

- **Name:** Farah Raza
- **Registration Number:** 25BHI10027
- **Branch:** B.Tech CSE (Health Informatics)
- **Semester:** First Year – Semester 2
- **Course Code:** CSE0001
- **Course Title:** Digital Literacy

---

2. Introduction

In today's hyper-connected world, digital literacy is no longer optional. It is survival. This project was designed to build foundational digital skills and promote responsible, ethical, and professional use of technology.

This Digital Literacy Portfolio was developed as part of the academic requirements of CSE0001 at VIT Bhopal University. The project simulates the role of a **Student Digital Ambassador**, aiming to educate peers on safe internet practices, digital professionalism, and awareness of cyber threats.

The portfolio is divided into five structured tasks, each aligned with a specific module of the course.

---

3. Objectives of the Project

The key objectives of this project are:

- To understand the concept and importance of digital literacy
- To develop a professional digital presence
- To gain hands-on experience with coding and collaboration platforms
- To learn formal communication through professional emails

- To create awareness about cybercrime and online safety

---

4. Project Structure

The project consists of five tasks, each carrying 20 marks:

Task	Module	Description
Task 1	Module 1	Digital Literacy Infographic
Task 2	Module 2	Student Digital Portfolio
Task 3	Module 3	Coding & Collaboration Platforms
Task 4	Module 4	Professional Email & Etiquette
Task 5	Module 5	Cybercrime Awareness Case Study

---

5. Detailed Description of Tasks

5.1 Task 1 – Digital Literacy Awareness Infographic

This task involved designing a one-page infographic using Canva.

Key Components:

- Definition of digital literacy
- Safe internet practices
- Importance of maintaining a professional online presence

The infographic was created with a focus on first-year students who may have limited exposure to digital responsibility concepts. Visual clarity and simplicity were prioritized.

5.2 Task 2 – Student Digital Portfolio

In this task, professional profiles were created across multiple platforms to establish an online identity.

Platforms Used:

- GitHub – for showcasing coding work and repositories
- LinkedIn – for professional networking and career opportunities
- ResearchGate – for academic and research exposure

This task helped in understanding how digital identity plays a crucial role in career growth and visibility.

5.3 Task 3 – Coding & Collaboration Platforms

This task was divided into two parts:

Part A – Coding Practice

A beginner-level problem ("Solve Me First") was completed on HackerRank using Python.
This introduced:

- Basic coding environment
- Input/output handling
- Submission and evaluation system

Part B – Google Forms

A Digital Literacy Awareness Quiz was created using Google Forms.

Features:

- Multiple-choice and short-answer questions
- Automatic response collection
- Integration with Google Sheets

This demonstrated how digital tools can be used for collaboration and data collection.

5.4 Task 4 – Professional Email & Etiquette Guide

This task focused on formal communication skills.

Part A – Email Writing
Two professional emails were drafted:

1. Request for assignment deadline extension
2. Inquiry about internship opportunities

Both emails followed proper structure:

- Clear subject line
- Formal tone

- Logical paragraph structure
- Proper closing

Part B – Social Media Checklist
A checklist of Do's and Don'ts was created to guide students in maintaining a responsible online presence.

5.5 Task 5 – Cybercrime Awareness Case Study

This task addressed real-world digital risks.

Case Study Topic: UPI Fraud (OLX Scam Pattern)

A scenario was developed where a student is tricked into entering their UPI PIN, leading to financial loss.

Prevention Measures:

- Awareness about fraudulent collect requests
- Importance of never sharing UPI PIN
- Immediate reporting steps

Reporting Channels:

- Cybercrime portal
- Helpline number 1930

This task emphasized the importance of cybersecurity awareness in everyday digital interactions.

---

6. Tools and Technologies Used

- Canva – Infographic design
- GitHub – Repository and portfolio hosting
- LinkedIn – Professional networking
- ResearchGate – Academic profile
- HackerRank – Coding practice
- Google Forms & Sheets – Data collection and analysis
- Markdown – Documentation

---

7. Learning Outcomes

Through this project, the following skills were developed:

- Understanding of digital literacy concepts
- Ability to create and manage a professional digital identity
- Basic coding and problem-solving skills
- Effective written communication
- Awareness of cyber threats and preventive measures

---

8. Conclusion

This project successfully provided practical exposure to essential digital skills required in modern academic and professional environments.

It highlighted that digital literacy is not just about using technology, but about using it **responsibly, securely, and effectively**. The tasks collectively built a strong foundation for navigating the digital world with confidence.
